

### Prehistoric- Britain

We only know about life a long time ago because people have found things that have been left behind.

We can find clues about the past from things people find in the ground. Scientists who learn about things from a long time ago are called archaeologists.

### The Ice Age

During the Ice Age, almost all of Great Britain was covered by thick sheets of ice called glaciers. No people lived in Great Britain. An animal called a Woolly Mammoth lived in Britain, it is now extinct.

### The Stone Age

Stone Age people made tools out of stone, wood or bone.

They had to survive by hunting wild animals, or gathering wild food and would move around to find these.

### The Bronze Age

This is a time long ago when people discovered how to make bronze.

### The Iron Age

The Iron Age is a time when people began to make things from a metal called iron.

During the Iron Age, Celts lived in Britain.

We know about Celts because of the things they left behind.
